

Creating Your First Expo App

This guide walks you through creating and running your first Expo React Native application.

Prerequisites: Complete the Environment Setup Guide first.

Step 1: Create a New Expo App

```
npx create-expo-app@latest my-expo-app --template blank
cd my-expo-app
```

Step 2: Run the Expo App

```
npx expo start
```

Step 3: Run App on Device

Choose one:

- Phone: Open Expo Go app and scan QR code
 - Android Emulator: Press **a**
 - iOS Simulator (macOS only): Press **i**
-

Step 4: Test Hot Reload

Edit App.js and save changes to see live reload.

Step 5: Stop the App

Press Ctrl + C
